

Remember your first flirtations with the World Wide Web - framed by the distinctive sounds of dial-up internet? The Music Modem keyboard instrument has been designed to harness those characteristically distorted sounds and turn them into music! Offering the full range of your favourite dial-up modem sounds in 3 modes, 5 tones and 8 notes, the Music Modem offers nostalgic geeks a chance to relive the 'soundtrack' of their youth. Use it as a speaker via the 3.5mm jack input or inspire a jam session by connecting it via the AUX socket to another Music Modem or instrument.

- Keyboard with dial-up modem tones
- 3 modes, 5 tones and 8 notes
- 3.5mm jack input - use it as a speaker!
(Cable not included)
- Connect to other Music Modems or musical instruments, i.e. keyboard (cable not included)
